

Glen Ridge High School
A Tradition of Excellence

Calculator Information

The Glen Ridge High and Middle School Programs require a calculator for all math classes.

Students in grades 7 through 12 and will need a TI-83 Plus or TI-84 Plus graphing calculator. These are the standard calculators used in colleges.

Students taking AP Calculus should consult their teacher for calculator requirements.

All of the models recommended are approved for student use on standardized tests.

Thank you in advance for your continued cooperation.
