

# Young Learners 1 2018-2019

# SPRING Newsletter

## We've been busy...

- Building Ramps  
Students became engineers to create bridges with various slopes.
- Being detectives  
Students used deductive reasoning to solve mysteries.
- Solving tangram puzzles  
Students did calisthenics for their brains by exploring tangrams.
- Investigating capillary action  
Students learned that liquids can travel upwards with a fun science experiment.

## Upcoming...

Students will be challenged to

- design a machine for collecting nuts
- solve puzzles
- explore the properties of liquids
- build nests
