Course Title: Algebra I

Subject: Mathematics

Grade Level: 9th

Duration: Full Year

Prerequisite: Algebra I Concepts 8th Grade or Advanced Algebra 8th Grade

Elective or Required: Required

Mathematics Mission Statement

Mathematics is an integral part of our lives. Students must be actively involved in their mathematics education through the use of modeling and demonstrating the ability to persevere through problem solving. The mathematics curricula will emphasize critical thinking skills through a balance of logic and reasoning, attention to precision by utilizing patterns and structure, and bridging these ideas to cross-curricular learning. Students will be engaged and challenged in a student-centered learning environment that is developmentally appropriate and will communicate mathematical ideas, both in a verbal and written form. Through effectively applying hands-on manipulatives, basic computation skills and the use of technical writing to justify their processes, students will critique the work of themselves and others.

Course Description: Algebra is a basic course for all college preparatory mathematics courses. Instructional emphasis will be placed on modeling real-life situations with expressions, equations, inequalities and systems of equations, and inequalities. After we cover the basics, students will learn what a function is. We will take a closer look at three different types of functions: linear, quadratic, and exponential. Students will spend most of the third marking period studying quadratics. Students will learn how to graph and solve quadratics using various methods. In addition, students will explore functions as they represent real-world phenomena in the form of tables, equations and graphs through the use of technology.

Author: Sean Fitzpatrick
Date Submitted: Summer 2017
Algebra I

I Solving Equations and Inequalities

Approximate # Of Weeks: 2

Essential Questions:
- How do you solve equations?
- How do you solve proportions?
- How do you solve inequalities?
- How can you use equations to solve real world applications?
- How do you write compound inequalities?
- How are “and” compound inequalities different than “or” compound inequalities?
- How do you solve compound inequalities?
- How can you check a solution to an equation by hand?
- How can you check a solution to an equation on the calculator?
- How do you solve literal equations?
- How do you generate a table on the calculator for literal equations?
- How do you solve absolute value equations?
- How do you solve absolute value inequalities?
- How do you solve absolute value equations and inequalities on the graphing calculator?

Upon completion of this unit students will be able to:
- Solve multi-step equations.
- Solve multi-step inequalities.
- Solve compound inequalities.
- Use equations, inequalities, and compound inequalities to solve real world applications.
- Solve literal equations.
- Solve absolute value equations and inequalities.
- Generate tables on the graphing calculators for literal equations.

NJ Student Learning Standards:
- A.CED.1, 2, 4
- A.REI.1, 3
- A.SSE.1
- N.Q.1-3

Interdisciplinary Standards (njcccs.org)
- Standard 5.1 – Science Practices
- Standard 8.1 -- Computer and Information Literacy
- Standard 8.2 – Technology Education
- Standard 9.1 – 21st - Century Life & Career Skills
- Standard 9.3 – Career Awareness, Exploration, and Preparation
Activities – include 21st Century Technologies:
- TI-Calculator Activity – solving equations by graphing (Holt and McDougal)
- Equation Puzzle (Big Ideas)
- Solving Simple Equations Activities (Big Ideas)
- Solving Multi-Step Equations Activities (Big Ideas)
- Solving Equations with Variables on Both Sides Activities (Big Ideas)
- Smart notebook lessons
- Online quizzes from textbook website
- Online videos from textbook website
- Class lecture and discussion in class and on google classroom
- Khan Academy
- Youtube videos

Enrichment Activities:
- Study Guide and Intervention
- Skills Practice
- Word Problem Practice
- Practice
- Mathbits activities

Methods of Assessments/Evaluation:
- Thumbs up/down
- Think-pair-share
- Dry erase response
- Find the mistake
- Kahoot
- Homework
- Graded classwork
- Partner activities
- Google Classroom exit ticket/question
- Chapter Test
- Individual problem assessment during lesson
- Graphing calculator check
- Self-Assessment (4-3-2-1)
- Open-ended question
- Skyward quizzes

Resources/Including Online Resources
- Online Textbook Information: connected. my.hrw.com
- Google Classroom
- Various Youtube channels
- TI-83/84 Graphing Calculator
- Big Ideas Algebra Textbook by Holt McDougal

### II Functions

**Approximate # Of Weeks:** 3

**Essential Questions:**
- What makes a relation a function?
- How can you tell if a relation is a function by looking at a graph?
- How can you tell if a relation is a function by mapping?
- How can you model real-world situations using a function?
- How can you find the domain and range of a function?
- How can you decide whether the domain of a function is discrete or continuous?

**Upon completion of this unit students will be able to:**
- Match simple graphs with situations
- Determine if a relation is a function by mapping and looking at its graph
- Graph a function
- Graph a function when a domain is given
- Find the domain and range of relations and functions
- Use a function notation to evaluate functions
- Create and interpret scatter plots by hand and on the graphing calculator
- Extend an arithmetic sequence
- Find a given term of an arithmetic sequence

**NJ Student Learning Standards:**
- A.APR.1
- A.CED.1-3
- A.REI.10
- A.SSE.1
- N.Q.1, 2
- F.BF.1, 2
- F.IF.1, 2, 4-7
- F.LE.2
- S.ID.6

**Interdisciplinary Standards (njcccs.org)**
- Standard 5.1 – Science Practices
- Standard 8.1 -- Computer and Information Literacy
- Standard 8.2 – Technology Education
- Standard 9.1 – 21st Century Life & Career Skills
- Standard 9.3 – Career Awareness, Exploration, and Preparation

**Activities – include 21st Century Technologies:**
- SmartBoard powerpoint presentations
- Lecture and class discussion
- Vertical-Line Test Activity (Holt McDougal)
- Modeling Activity – variable relationships (Holt McDougal)
- TI-Calculator Activity – Connect Function Rules, Tables, and Graphs
- TI-Calculator Activity – Interpret Scatter Plots and Trend Lines
- The Domain and Range of a Function Activities 1 – 3 (Big Ideas)
- Finding Linear Patterns Activities 1 – 2 (Big Ideas)
- Matching Function with their Graphs (Big Ideas)
- Evaluating a Function Activity (Big Ideas)
- Comparing Graphs of Functions Activity (Big Ideas)
- Using a Pattern in Science to Predict Activity (Big Ideas)
- Writing a Story Activity (Big Ideas)
- Review Game Writing Linear Functions – Domain and Range (Big Ideas)
- Online quizzes from textbook website
- Online videos from textbook website

**Enrichment Activities:**
- Study Guide and Intervention
- Skills Practice
- Word Problem Practice
- Practice
- Mathbits activities

**Methods of Assessments/Evaluation:**
- Thumbs up/down
- Think-pair-share
- Dry erase response
- Find the mistake
- Kahoot
- Homework
- Graded classwork
- Partner activities
Google Classroom exit ticket/question
Chapter Test
Individual problem assessment during lesson
Graphing calculator check
Self-Assessment (4-3-2-1)
Open-ended question
Skyward quizzes

                - Find a given term of an arithmetic sequence | |

III Linear Functions

Approximate # Of Weeks: 4

Essential Questions:
- How do you find the rate of change or slope?
- How can you find the slope of a linear equation?
- How does the slope affect the graph of a linear function?
- How does the y-intercept affect the graph of a linear function?
- How do you graph a linear function in slope-intercept form?
- How do you graph a linear function that isn’t in slope-intercept form?
- How do you write an equation for a function given a table or graph?
- How do you write the equation of a line when the slope and the y-intercept is given?
• How do you write the equation of a line when the slope and a point is given?
• How do you write the equation of a line when two points are given?
• When do we use slope-intercept form and when do we use point-slope form of a line?
• How can you use slope and equations to compare functions?
• How do you use a graphing calculator to perform linear regression?
• How do you model real world situations using linear functions?

Upon completion of this unit students will be able to:
• Identify linear relations and functions.
• Write linear equations in all three forms: slope-intercept, point-slope, and standard
• Find rate of change using a graph, the algebraic formula, the linear equation, or by looking at a table of values
• Determine the slope of a line
• Write an equation of a line given the slope and a point on the line using point-slope form and slope-intercept form
• Write an equation of a line parallel or perpendicular to a given line.
• Use scatter plots and make predictions
• Model data using lines of regression.
• Use transformations to estimate graphs of various linear functions.
• Describe transformations of functions.
• Graph linear inequalities.

NJ Student Learning Standards:
• A.CED.1-3
• A.REI.10-11
• F.BF.1, 3-4
• F.IF.1, 2, 4-7
• F.LE.1, 2, 5
• G.GPE.5
• N.Q.1, 2
• S.ID.6-9

Interdisciplinary Standards (njeccs.org)
• Standard 5.1 – Science Practices
• Standard 8.1 – Computer and Information Literacy
• Standard 8.2 – Technology Education
• Standard 9.1 – 21st Century Life & Career Skills
• Standard 9.3 – Career Awareness, Exploration, and Preparation

Activities – include 21st Century Technologies:
• SmartBoard powerpoint presentations
• Lecture and class discussion
• Word Problem Practice – Relations and Functions
• Word Problem Practice – Linear Relations and Functions
• Word Problem Practice – Rate of Change and Slope
• Word Problem Practice – Writing Linear Equations
• Word Problem Practice – Scatter Plots and Lines of Regression
• Word Problem Practice – Graphing Linear and Absolute Value Inequalities
- Enrichment – Median-Fit Lines • Enrichment – Limits
- TI-Calculator Activity – Graphing Linear Functions
- TI-Calculator Activity – Exploring Linear Functions
- TI-Calculator Activity – Graphing Linear Inequalities
- TI-Calculator Activity – Graphing Absolute Value Inequalities
- Online quizzes from textbook website
- Online videos from textbook website

**Enrichment Activities:**
- Study Guide and Intervention
- Skills Practice
- Word Problem Practice
- Practice
- Mathbits activities

**Methods of Assessments/Evaluation:**

| 1              | - Identify a linear function by looking at it’s graph  
- Identify the slope of a line when a linear equation is in slope-intercept form |
| 2              | - Write the equation of a line when the slope and y-intercept or given  
- Find the slope of a line when two points are given |
| 3              | - Write the equation of a line when two points are given  
- Write the equation of a line in any form  
- Write the equations of lines that parallel to a given line  
- Find the slope of a line by looking at the equation, graph, or table of a value  
- Graph linear inequalities |
| 4              | - Model real world situations using linear functions  
- Write the equations of lines that perpendicular to a given line  
- Make a scatterplot by hand and on the graphing calculator to make predictions for a given set of data |

IV Systems of Equations and Inequalities

Approximate # Of Weeks: 5

Essential Questions:
- How do you find the solution of a system of linear equations by graphing?  
- How do you use substitution to solve a system of linear equations?  
- How do you solve a system of linear equations by elimination?  
- How do you solve a system of linear inequalities?  
- How can you use systems of linear equations or inequalities to model and solve real world situations?  
- How many solutions can a system of linear equations have?

Upon completion of this unit students will be able to:
- Identify solutions of systems of linear equations in two variables  
- Solve systems of linear equations in two variables by graphing by hand and on the graphing calculator  
- Solve systems of linear equations in two variables by substitution  
- Solve systems of linear equations in two variables by elimination  
- Choose an appropriate method for solving systems of linear equations  
- Solve special systems of linear equations in two variables  
- Graph and solve linear inequalities in two variables  
- Graph and solve systems of linear inequalities in two variables  
- Write the system of linear inequalities in two variables when a graph is given  
- Solve a system of linear inequalities in two variables on the graphing calculator  
- Solve real life application using a system of linear equation or inequality in two variables.
NJ Student Learning Standards:
- CC.9-12. A.SSE.1
- CC.9-12. A.CED.2
- CC.9-12. F.IF.4-6, 9

V Polynomials

Approximate # Of Weeks: 4

Essential Questions:
- How can you tell if an expression is a polynomial?
- How do you classify a polynomial by the degree and number of terms?
- How do you use the properties of integer exponents?
- How can you perform operations with polynomials?
- How can you use the distributive property to multiply binomials?
- What are the patterns in the special products of when multiplying polynomials?

Upon completion of this unit students will be able to:
- Evaluate polynomial expressions using function notation
- Simplify and evaluate expressions containing zero and integer exponents
- Evaluate and simplify expressions containing rational exponents
- Classify polynomials and write polynomials in standard form
- Add and subtract polynomials
- Multiply polynomials using the distributive property
- Find special products of binomials

NJ Student Learning Standards:
- A.CED.2, 3
- A.REI.3, 5, 6, 11, 12
- N.Q.1, 2

Interdisciplinary Standards (njcccs.org)
- Standard 5.1 – Science Practices
- Standard 8.1 – Computer and Information Literacy
- Standard 8.2 – Technology Education
- Standard 9.1 – 21st - Century Life & Career Skills
- Standard 9.3 – Career Awareness, Exploration, and Preparation

Activities – include 21st Century Technologies:
- SmartBoard powerpoint presentations
- Lecture and class discussion
- Group Multiplying Monomials Activity – students create either a monomial, binomial, trinomial, or a quadric polynomial then break into groups and multiply each pair of polynomials in their group (Holt and McDougal – Lesson Alternative Assessment)
- Properties of Exponents Activities (Big Ideas)
- Adding and Subtracting Polynomials Activities (Big Ideas)
- Multiplying Polynomials Activities (Big Ideas)
- Special Products of Polynomials Activities (Big Ideas)
- Online quizzes from textbook website
- Online videos from textbook website

Enrichment Activities:
- Study Guide and Intervention
- Skills Practice
- Word Problem Practice
- Practice
- Mathbits activities

Methods of Assessments/Evaluation:
- Thumbs up/down
- Think-pair-share
- Dry erase response
- Find the mistake
- Kahoot
- Homework
- Graded classwork
- Partner activities
- Google Classroom exit ticket/question
- Chapter Test
- Individual problem assessment during lesson
- Graphing calculator check
- Self-Assessment (4-3-2-1)
- Open-ended question
- Skyward quizzes

**Resources/Including Online Resources**

                • Evaluate and simplify expressions containing rational exponents |  |

**VI Factoring**

**Approximate # Of Weeks: 5**

**Essential Questions:**
- What is the 1st step when factoring?
- Why do you factor out the GCF 1st when factoring?
- How do you factor quadratic trinomials?
- What is the shortcut when factoring quadratic trinomials when a = 1?
- What is the common binomial theorem?
- How can you use common factors to write a polynomial in factored form?
- How do you know when you are done factoring a polynomial?
- How can you recognize and factor special products?

**Upon completion of this unit students will be able to:**
- Find the GCF of polynomials
- Factor by grouping
- Factor quadratic trinomials when a = 1
- Factor quadratic trinomials when a doesn't = 1
- Factor perfect-square trinomials
- Factor the difference of two squares
- Choose an appropriate method for factoring a polynomial
- Combine methods for factoring a polynomial

**NJ Student Learning Standards:**
- A.SSE.2
- A.APR.3

**Interdisciplinary Standards (njeccs.org)**
- Standard 5.1 – Science Practices
- Standard 6.3 – Active Citizenship in the 21st Century
- Standard 8.1 – Computer and Information Literacy
- Standard 8.2 – Technology Education
- Standard 9.1 – 21st - Century Life & Career Skills

**Activities – include 21st Century Technologies:**
- SmartBoard powerpoint presentations
- Lecture and class discussion
- TI-Calculator Activity – use a graph to factor polynomials (Holt McDougal)
- Factoring \( x^2 + bx + c \) Activities (Big Ideas)
- Factoring \( ax^2 + bx + c \) Activities (Big Ideas)
- Online quizzes from textbook website
- Online videos from textbook website

**Enrichment Activities:**
- Study Guide and Intervention
- Skills Practice
- Word Problem Practice
- Practice
- Mathbits activities

**Methods of Assessments/Evaluation:**
- Thumbs up/down
- Think-pair-share
- Dry erase response
- Find the mistake

VII Quadratics

Approximate # Of Weeks: 5

Essential Questions:
- How can you graph a quadratic function?
- How do you graph a function in vertex form?
- How can you solve a quadratic equation by graphing by hand?
- How can you solve a quadratic equation by graphing on the graphing calculator?
- How can you solve a quadratic equation by factoring?
- How can you solve a quadratic equation using square roots?
- How can you solve a quadratic equation using completing the square?
- How can you solve a quadratic equation using the quadratic formula?
- How can you model a real-world situation using a quadratic function?
- How can you use the discriminant to determine the number of solutions of a quadratic equation?
- How do you solve quadratic equations using the quadratic formula?

Upon completion of this unit students will be able to:
- Identify quadratic functions and determine whether they have a minimum or maximum
- Graph a quadratic function and identify: the vertex, the axis of symmetry, and the zeros of the graph
- Graph a quadratic function in standard form
- Graph and transform quadratic functions when in standard and vertex form
- Solve quadratic equations by graphing
- Solve quadratic equations by factoring
- Solve quadratic equations by completing the square
- Solve quadratic equations by using the Quadratic Formula
- Determine the number of solutions of a quadratic equation by using the discriminant

**NJ Student Learning Standards:**
- A.APR.3
- A.CED.1-3
- A.REI.1, 4, 7, 10, 11
- A.SSE.3
- F.IF.2, 4, 5, 7-9
- F.BF.1, 3
- N.Q.1, 2
- S.ID.6

**Interdisciplinary Standards (njcccs.org)**
- Standard 5.1 – Science Practices
- Standard 6.3 – Active Citizenship in the 21st Century
- Standard 8.1 – Computer and Information Literacy
- Standard 8.2 – Technology Education
- Standard 9.1 – 21st - Century Life & Career Skills

**Activities – include 21st Century Technologies:**
- SmartBoard powerpoint presentations
- Lecture and class discussion
- PowerPoint Presentations (Holt McDougal)
- Selected online games and activities (see appendix)
- Exploring Activity – axis of symmetry using graphing (Holt McDougal)
- TI-Calculator Activity – The Family of Quadratic Functions (Holt McDougal)
- TI-Calculator Activity – Explore Roots, Zeros, and x-Intercepts (Holt McDougal)
- Solving Quadratic Equations by Graphing Activities (Big Ideas)
- Solving Quadratic Equations Using Square Roots Activities (Big Ideas)
- Solving Quadratic Equations by Completing the Square Activities (Big Ideas)
- Solving Quadratic Equations by Using the Quadratic Formula Activities (Big Ideas)
- Online quizzes from textbook website
- Online videos from textbook website

**Enrichment Activities:**
- Study Guide and Intervention
- Skills Practice
- Word Problem Practice
- Practice
- Mathbits activities

**Methods of Assessments/Evaluation:**
- Thumbs up/down
- Think-pair-share
- Dry erase response
- Find the mistake
- Kahoot
- Homework
- Graded classwork
- Partner activities
- Google Classroom exit ticket/question
- Chapter Test
- Individual problem assessment during lesson
- Graphing calculator check
- Self-Assessment (4-3-2-1)
- Open-ended question
- Skyward quizzes

VIII Exponential Functions

Approximate # of Weeks: 4

Essential Questions:
- How can you tell if an equation is an exponential function?
- How can you tell if a function is exponential by looking at its table?
- How do you write, graph, and interpret exponential growth and decay functions?
- How does the graph of \( f(x) = ab^x \) change when \( a \) and \( b \) are changed?
- How can you solve problems modeled by equations involving variable exponents?
• How can you recognize, describe, and compare linear, exponential, and quadratic functions?

Common Core Standards:
• A.CED.1, 2
• A.REI.11
• F.BF.1-3
• F.IF.1-7, 9
• F.LE.1-3, 5, 6

Upon completion of this unit students will be able to:
• Find the nth term of a geometric sequence
• Evaluate exponential functions
• Identify and graph exponential functions
• Solve problems involving exponential growth and decay
• Compare linear, quadratic, and exponential models
• Given a set of data, decide which type of function models the data and write an equation to describe the functions
• Identify linear and nonlinear rates of change
• Compare rates of change
• Compare functions in different representations
• Estimate and compare rates of change

Interdisciplinary Standards (njcccs.org)
• Standard 5.1 – Science Practices
• Standard 6.1 – U.S. History: America in the World
• Standard 6.3 – Active Citizenship in the 21st Century
• Standard 8.1 – Computer and Information Literacy
• Standard 8.2 – Technology Education
• Standard 9.1 – 21st - Century Life & Career Skills

Activities – include 21st Century Technologies:
• SmartBoard powerpoint presentations
• Lecture and class discussion
• PowerPoint Presentations (Holt McDougal)
• Comparing Linear, Exponential, and Quadratic Function Activities (Big Ideas)
• Exponential Functions Activities (Big Ideas)
• Exponential Growth Activities (Big Ideas)
• Exponential Decay Activities (Big Ideas)
• Simplifying Square Roots Activities (Big Ideas)
• Online quizzes from textbook website
• Online videos from textbook website

Enrichment Activities:
• Study Guide and Intervention
• Skills Practice
• Word Problem Practice
• Practice
• Mathbits activities
Methods of Assessments/Evaluation:
- Thumbs up/down
- Think-pair-share
- Dry erase response
- Find the mistake
- Kahoot
- Homework
- Graded classwork
- Partner activities
- Google Classroom exit ticket/question
- Chapter Test
- Individual problem assessment during lesson
- Graphing calculator check
- Self-Assessment (4-3-2-1)
- Open-ended question
- Skyward quizzes

Resources/Including Online Resources
- Online Textbook Information: connected.mcgraw-hill.com
- Google Classroom
- Various Youtube channels
- TI-83/84 Graphing Calculator
- Big Ideas Algebra Textbook by Holt McDougal

IX – Real Numbers

Approximate # of Weeks: 3

Essential Questions:
- What is the difference between rational and irrational numbers?
- How do you simplify radicals?
- How do you simplify radical expressions using operations?

Common Core Standards:
Upon completion of this unit students will be able to:

- Simplify radical expressions
- Simplify radical expressions using operations
- Classify real numbers
- Classifying rational and irrational numbers

Interdisciplinary Standards (njcccs.org)

- Standard 5.1 – Science Practices
- Standard 6.1 – U.S. History: America in the World
- Standard 6.3 – Active Citizenship in the 21st Century
- Standard 8.1 – Computer and Information Literacy
- Standard 8.2 – Technology Education
- Standard 9.1 – 21st - Century Life & Career Skills

Activities – include 21st Century Technologies:

- SmartBoard powerpoint presentations
- Lecture and class discussion
- PowerPoint Presentations (Holt McDougal)
- Selected online games and activities (see appendix)
- Verifying Rationals and Irrationals (mathbits)
- Online quizzes from textbook website
- Online videos from textbook website

Enrichment Activities:

- Study Guide and Intervention
- Skills Practice
- Word Problem Practice
- Practice
- Mathbits activities

Methods of Assessments/Evaluation:

- Thumbs up/down
- Think-pair-share
- Dry erase response
- Find the mistake
- Kahoot
- Homework
- Graded classwork
- Partner activities
- Google Classroom exit ticket/question
- Chapter Test
- Individual problem assessment during lesson
- Graphing calculator check
- Self-Assessment (4-3-2-1)
- Open-ended question
- Skyward quizzes
Resources/Including Online Resources

X Data Analysis and Probability

Approximate # of Weeks: 4

Essential Questions:
- What statistics can you use to characterize and compare the center and spread of data sets?
- Which statistics are most affected by outliers?
- How can you estimate statistics from data displayed in a histogram?
- How can you compare data sets using box plots?
- How can categorical data be organized and analyzed?
- How do you find the experimental probability of an event?
- How do you find the probability of a compound event?
- How can you use simulations to estimate probabilities?
- What is the difference between independent and dependent events?
- How can you display data in a way that helps you make decisions?

Common Core Standards:
- S.CP.1-4, 7
- S.IC.1
- S.ID.1-3, 5

Upon completion of this unit students will be able to:
- Use data presented in bar graphs and circle graphs to solve equations
- Organize data in tables and graphs
- Choose a table or graph to display data
- Create stem-and-leaf plots
• Describe the central tendency of a data set
• Create and interpret box-and-whisker plots
• Create dot-plots
• Use a dot plot to describe the shape of a data distribution
• Recognize misleading graphs
• Recognize misleading statistics
• Examine different sampling methods and sources of bias
• Use a number cube to simulate a probability experiment
• Determine the experimental probability of an event
• Use experimental probability to make predictions
• Use a graphing calculator to find experimental probabilities by generating random numbers
• Determine the theoretical probability of an event
• Find the probability of independent events
• Find the probability of dependent events
• Find the probability of compound events

**Interdisciplinary Standards (njccs.org)**

• Standard 5.1 – Science Practices
• Standard 6.1 – U.S. History: America in the World
• Standard 6.3 – Active Citizenship in the 21st Century
• Standard 8.1 – Computer and Information Literacy
• Standard 8.2 – Technology Education
• Standard 9.1 – 21st - Century Life & Career Skills

**Activities – include 21st Century Technologies:**

• SmartBoard powerpoint presentations
• Lecture and class discussion
• PowerPoint Presentations (Holt McDougal)
• Selected online games and activities (see appendix)
• TI-Calculator Activity – use random numbers to find experimental probability (Holt McDougal)
• Exploring Activity – use dice rolls to determine compound events (Holt McDougal)
• Measures of Central Tendency Activities (Big Ideas)
• Box-and-Whisker Activities (Big Ideas)

**Enrichment Activities:**

• Study Guide and Intervention
• Skills Practice
• Word Problem Practice
• Practice
• Mathbits activities

**Methods of Assessments/Evaluation:**

• Thumbs up/down
• Think-pair-share
• Dry erase response
• Find the mistake
• Kahoot
- Homework
- Graded classwork
- Partner activities
- Google Classroom exit ticket/question
- Chapter Test
- Individual problem assessment during lesson
