Visual & Performing Arts Mission Statement:

An education in the arts is an essential part of the academic curriculum for the achievement of human, social and economic growth. An arts education enables personal, intellectual and social development for each individual and strives to enhance the student’s sense of confidence and self-esteem. The visual arts are uniquely qualified to cultivate a variety of multiple intelligences with powerful ways of communicating ideas, thoughts and feelings. A well-rounded program for intellectual growth must support the development of spatial, kinesthetic, interpersonal and intrapersonal intelligences. Creativity in solving art-related problems provides students with values that will better prepare them for future professional endeavors.

The Glen Ridge Public Schools offer every student access to a balanced, comprehensive, cohesive and sequential program of study in the visual arts. Arts education ensures the development of intuition, imagination, expression, performance and critiquing skills. An interdisciplinary approach to the arts ensures every student experiences and understands the arts in relationship to history and culture. The fine arts contribute to the growth of students into life-long learners by nurturing their abilities and interests, developing their divergent thinking, cultivating their multiple intelligences and enriching their lives.
